- Easier way to accomplish brand differentiation

Suitable for a wide range of formulations
- Available in gelatin and HPMC variants

Maximizes yield on high-speed filling machines
- Proven machine-friendly design

VALUE ADDED SERVICES

Formulation Compatibility Support

Supported by our strong R&D capabilities and expert resources, we work closely with the customers' product development teams on aspects related to compatibility between the formulation and the capsule. This helps customers ensure selection of the right capsule at the development stage. We also work with customers on innovative customization of capsules to suit the formulation requirement and give them a competitive edge in the market.

Technical Services

We believe that our responsibility does not end with the supply of right quality capsules. We go an extra mile in partnering with our customers to ensure that they achieve maximum productivity with our capsules on the filling machines. Leveraging our group level expertise in manufacturing of capsule-filling machines and engineering knowledge, our technical service team Probatively helps customers in maximizing the yield. We also support them by overcoming the challenges associated with the capsule-filling process on the shop floor.

Regulatory Support

With our rich global experience and exposure to all key markets, we are aligned with the regulatory requirements of both developed and emerging markets, laying emphasis on cross-country compliances. We have a dedicated regulatory experts team that ensures process and product Compliances for meeting the regulatory requirements of different markets. We work closely with our customers to actively support them on all documentary requirements for exporting products to the regulated markets of Europe and the USA.
